

YENUMULA TEJA ANKA VENKATA SUBRAHMANYAM

Vijayawada, 520001, Andhra Pradesh, India | 2200060020eee@gmail.com | LinkedIn : [View](#)

SUMMARY

Results-driven B.Tech student in Electrical and Electronics Engineering with a strong foundation in Artificial Intelligence & Intelligent Process Automation. Experienced in Front-End, Full Stack, and IoT development with hands-on expertise in building user-centric applications. Proficient in designing intuitive and responsive user interfaces and integrating Internet of Things (IoT) technologies. Developed projects, seamlessly integrating hardware and software components to deliver practical applications tailored to user needs.

EDUCATION

K L UNIVERSITY

Electrical and Electronics Engineering | B.Tech | Vaddeswaram, Guntur district.

Jul 2022 - May 2026

Majored in Electrical and Electronics Engineering with an 8.48 CGPA, specializing in AI&IPA.

Narayana Junior College

MPC | Intermediate | Vijayawada, Krishna district

Jun 2020 - May 2022

Completed the MPC course, achieving an 80.3% grade and gaining foundational knowledge.

K C High School

SSC | Vijayawada, Krishna district

Jun 2020 - May 2022

Completed SSC, achieving a 92 percent score and demonstrating strong academic performance.

TECHNICAL SKILLS

IOT	C - Language	MATLAB Software
Embedded Systems	Java - Language	Fusion 360 Software
Microcontrollers	Python - Language	
Circuit Analysis	Electrical Machines & Power Systems	

SOFT SKILLS

Good speaker
Team coordination
Problem-Solving

PROJECTS

Load Balancing in Power Grids Using a Machine Learning

- Load balancing in power grids is crucial for ensuring stability, reliability, and efficient distribution of electricity. Integrating Machine Learning (ML) models into this process enables predictive and data-driven decision-making, minimizing power outages and reducing energy wastage.
- Pre-Scheduling via ML Model, Peak Demand Prediction.

Smart Street Light Automations Using IOT

- This project focuses on automating street lighting systems using Internet of Things (IoT) technology to enhance energy efficiency, reduce operational costs, and ensure timely maintenance through real-time monitoring and fault detection.
- Reduce Power Consumption, Automatic Fault Detection

AI-Powered Multi-Modal Vision System for Real-Time Solar Panel Fault Detection

- To improve the efficiency and safety of solar PV systems by detecting faults like hotspots, diode failures, soiling, and Reduce Power Consumption, Automatic Fault Detection
- Traditional inspection methods are slow, labor-intensive, and not suitable for large-scale solar farms.
- Use an AI-driven solution with deep learning for automatic fault detection.
- Works for manual or drone-based inspections, offering a faster, cost-effective, and intelligent solar panel monitoring solution.

CERTIFICATIONS

- **Artificial intelligence (AI) and machine learning (ML) using Python Level - 1 and Level - 2 Certified by Tessolve Pvt Limited.**

Gained hands-on experience with machine learning algorithms such as Linear Regression, Decision Trees, KNN, SVM, and Neural Networks using Scikit-learn and TensorFlow. Delivered successful small-scale AI solutions that improved predictive analytics, image classification, and natural language processing outcomes.[View](#)

- **Autodesk Certified User by Fusion 360.**

Acquired hands-on experience in parametric modelling, assembly design, and technical drawing creation using Fusion 360. Designed and rendered 3D mechanical components and assemblies, implementing innovative custom gear mechanisms and ensuring precise tolerance specifications to demonstrate both creativity and engineering accuracy.[View](#)

- **AI - Associate Certified by Sales force.**

Gained understanding of Salesforce Einstein, AI Cloud, and generative AI tools for customer relationship management (CRM) enhancement. Identified and implemented AI-driven recommendation system use cases that enhanced business productivity, enabled data-driven decision-making, and improved customer personalization..[View](#)

ADDITIONAL INFORMATION

- **Languages:** English, Telugu, Hindi.
- **Awards/Activities:**

1] I have successfully organized 10+ student technical events focusing on social and immersive learning, aimed at enhancing student engagement, collaboration, and hands-on experience. These events provided platforms for knowledge-sharing, creative exploration, and interactive learning. Additionally, I served as the resource person for 2 specialized sessions, delivering insights and facilitating knowledge transfer on key academic or technical topics.

2] Participated in Smart India Hackathon (SIH) 2023, where I led the ideation and prototyping of a [describe project/solution], contributed technical solutions to address [problem area], and collaborated with a multidisciplinary team to qualify in the internal hackathon round in a competitive, real-world [View](#)

DECLARATION

- I hereby declare that the above-mentioned details are true and correct to the best of my knowledge and belief.
- Date: 24th October - 2025
- Place: Vijayawada
- Yenumula Teja Anka Venkata Subrahmanyam.
